## FOR HOME PLANTINGS

Low Growing,  
Medium and Tall

NOTE  
Unless noted otherwise, all Evergreens are shipped by Express, f. o. b. nursery.

### PYRAMID ARBOR-VITAE

For foundation or group planting in all landscape work. Retains the flat foliage and lovely bright green color at all seasons. Grows compact and develops naturally into perfect pyramidal form. May be sheared for strictly formal effects. 18 to 24 inch.

\$1.75 each; 2 for \$3.25

### GLOBE ARBOR-VITAE

Grows densely compact in a dwarf, globular shape. Foliage is flat and deep green in color. Is much used for formal planting and for low, evergreen hedges as they lend themselves admirably to shearing. May also be grown in tubs for use at formal entrances. 10 to 12 inch.

\$1.75 each; 2 for \$3.25

### SPREADING YEW

The spreading variety throws out sweeping branches similar to Pfitzer Juniper. May be kept trimmed back to desired size or to fit allotted space. Foliage is a shade of deep green, soft to the touch and always fresh looking. May be kept sheared for a low hedge, allowed to grow its graceful wand-like branches for informal corner plantings or trimmed into compact shape for formal effects. After the plant is several years old numerous red berries are borne close to the branches, remaining into the winter. Well rooted, 12 to 15 inch.

\$2.50 each; 2 for \$4.50.

### UPRIGHT YEW

General foliage characteristics same as the spreading variety described above, but grows in columnar, erect form. By keeping the plant lightly sheared as it grows, the foliage will be extremely dense and compact from the ground up. Valuable for corner plantings and accent pieces. Does well in shade and seems to be very little affected by disease or pests. 15 to 18 inches. \$2.50 each; 2 for \$4.50.

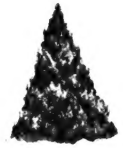

### HEMLOCK

Another splendid evergreen which does well in partially shaded spots is the Hemlock. It is one of the most graceful growing of plants. Foliage is a light fresh green which always looks well in any planting. Will grow to quite large size if left untrimmed; however, the plants should be kept lightly sheared as they develop, thus they will become much more beautiful and foliage will be dense and compact. When the desired height is reached the trees may be kept there by trimming back each year. We have a nice block of them in 12 to 18 inch size at \$2.50 each; 2 for \$4.50.

### JUNIPER EXCELSA STRICTA

(Spiny Greek Juniper)  
For a semi-dwarf pyramidal Evergreen, Juniper Stricta cannot be surpassed. Foliage is a silvery blue, very compact and cedar-like. Reaches about 4 feet at maturity in our section of the country. Will get slightly larger in the South and not quite as large in northern sections. Excellent to use where height is a factor in planning a planting. We offer nice plants in 12- to 15-inch size at \$1.75 each; 2 for \$3.25

PRIVET HEDGE

## ORDER IN QUANTITIES LISTED OR MULTIPLES THEREOF

### PLANTING AND GROWING HEDGES

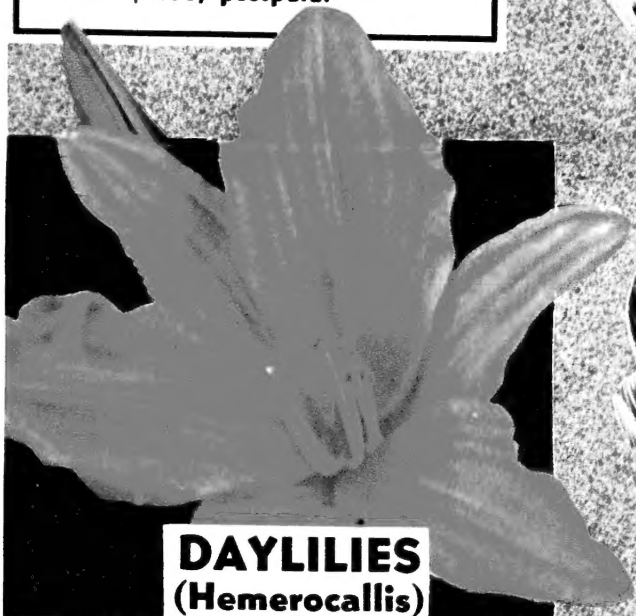

Beautiful hedges are easily grown if a few simple instructions are observed. Dig a trench 10 to 12 inches deep and the width of a spade. Set the plants a couple of inches deeper than they stood in the nursery. This insures a dense hedge at the base. Privet should be set 10 inches apart, Barberry about 18 inches. Shrubs such as Spirea 18 inches, Chinese Elm 2 feet, and Evergreens 2 to 3 feet. Spacing may be varied depending upon the density desired. After spacing plants, fill in about one-half of the depth of the trench, then flood with water. After settling fill in balance of the trench and tramp firmly. Leave a slight depression along each side of the hedge to retain water. Keep thoroughly soaked until well started. Privet should be cut back to about 8 to 10 inches after planting to promote vigorous growth. Hedges planted in this manner rarely fail to grow.

## A Hardy PERENNIAL of Widely Varied Usage SEDUM "SPECTABILIS" or "Live Forever"

A familiar plant to our older friends and customers. Many gardens contain the old-fashioned "Live Forever" which have grown and bloomed for many years in one location. It is now coming back into new favor as people rediscover its many good qualities.

One of the hardiest of all plants, it seems to thrive under the most difficult conditions. Comes up and blooms year after year with little or no attention. Withstands heat, drought, cold and shallow, poor soils. Foliage is ornamental all summer long and the large, flat heads of clear pink blooms are produced on sturdy stems and in abundance. Plant ordinarily reaches 8 to 12 inches in height with bloom stems rising 6 to 10 inches above foliage during blooming season.

2-Year, Field-Grown Transplanted Plants

40c Each; 4 for \$1.50; 8 for \$2.50;  
12 for \$3.50; 25 for \$6.00, Postpaid

## PERENNIAL PLANTING DISTANCES

Perennials should be planted 18 inches apart as a general rule. Some large growing types may need to be planted slightly farther apart. For borders and edging with dwarf varieties you will want to plant 6 to 12 inches apart. We give the average matured height in the descriptions of all perennials so that you may find it easy to plan your plantings.

### BEAUTIFUL PINK LYTHRUM

#### The Hardy Modern Strain

**Do Not Allow  
Your Phlox to  
Go to Seed**

Keep blooms cut as they fade. If you permit plants to go to seed they will drop hundreds of seeds right around the base of the plant. Next year masses of seedlings will spring up. These usually have the old magenta color and soon kill out your true variety. This soon makes the bed a mass of seedlings.

# ORIENTAL POPPIES

#### EVERBLOOMING TAMARIX

One of the finest ever grown. Beautiful shrub with soft fern-like foliage of a rich powder-blue color. Shell-pink blooms appear early in the season and continue until frost. Add a few of these and notice how they light up your whole planting. (Note: The wood of this shrub is extremely hard, therefore they are among the last shrubs to start leafing out in the spring. Many do not get out in leaf until the middle of June here in the nursery.)

**60c each; 3 for \$1.50.**

#### REDBUD - Cercis Canadensis

One of the handsomest of the low-growing, flat-topped trees. Attains a height of about 15 feet at maturity. Along the numerous, wide-spreading branches, rosy lavender blooms appear before the tree leafs out in spring. Flowers are so thick the tree appears as a small pink cloud. Due to the extreme hardness of the wood, the tree is usually very late in leafing out. **Nice, 3- to 4-ft. plants, only \$1.00 each; 2 for \$1.75.**

#### FIREBUSH (CYDONIA)

##### New, Upright Growing, Scarlet Type

Early in the spring this attractive shrub is completely covered with dazzling orange-scarlet flowers which are followed by small, fragrant, quince-shaped fruits. Foliage waxy and dark green. Branches are rough and closely knit, making it desirable for hedges.

For a tall hedge or to screen an unsightly view there is no shrub so valuable. Will grow to the height of 10 to 12 feet in a few years. A beautiful shrub both summer and winter. #### RED CORALBERRY

This is the greatest shrub for shady places that we have ever seen. Grows to a height of 5 feet with gracefully arching branches and lacy foliage. #### PUSSY WILLOW

#### FRENCH PUSSY WILLOW

A small tree-like shrub with attractive leaves 2 inches long and an inch wide. Its popular appeal is the conspicuous silky catkins that bud in the fall and make those "springy" bouquets just as the snow melts in the spring. **2-yr., 75c each; 3 for \$2.00**

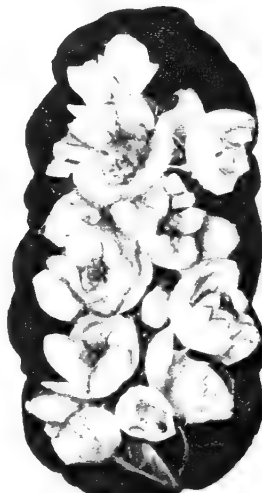

**NOTE:** Larger growing shrubs should be planted about 4 feet apart for shrub borders, medium growing sorts 2 to 3 feet apart and dwarf kinds about 1½ to 2 feet apart.

Imagine cutting an armload of blooms and not having a single thorn prick your fingers or arms. Imagine a bush producing bright red, fragrant, very double blooms prolifically from June until freezing weather. Then you have an idea of what to expect from "Festival." We cannot say too much about the good qualities of the "STRATFORD" rose. One of the most unique roses we have ever seen in that the open blooms have the odd, cactus-like appearance of the Cactus Dahlias. Buds are a delightful flesh pink, opening into large blooms so extremely double that there scarcely seems to be room for all the petals. The open blooms are creamy pink and the color holds for days as the many petals unfold. Blooms are produced almost continuously on both bush and pillar form from June until freezing weather. Plants are vigorous in growth with strong, erect canes and excellent foliage. On the pillar form the canes grow to a height of 8 to 10 feet, stiffly erect and sturdy. Ideal for planting on each side of a driveway entrance or wherever a post or pillar effect is wanted. Has the largest, extremely double, fragrant blooms of the bush form and bears them throughout the long summer and fall season. Each spring remove all but three or four of the most vigorous canes, trim the remaining ones back about one third. This enables the plant to produce abundant growth and bloom. Keep the plants well watered the first season after planting and each year apply some good plant food 3 or 4 times during the summer.

**PLEASE NOTE:** Successful Fall Transplanting of Roses Depends Upon the Plants Being Thoroughly Ripened by Frosts Before Digging. For This Reason We Will Not Make Shipment of Any Rose Plants Until After November 1st.

**AMERICA'S FAVORITE APPLE** which we are offering to the trade is a marvelous improvement over the common Delicious. It is much deeper color without stripes of red and partly green. Even in the heavily shaded portions of the tree the color is outstanding. Probably the most popular of all eating apples. Largest seller in markets. Very highly flavored and stays crisp and juicy after picking. We recommend this as one of the necessary varieties in all fruit tree plantings.

Similar to Delicious in shape. Fruit rich yellow color. Early bearing. Winter. Flesh fine-grained, crisp, juicy and melting, and really delicious. The tree is a hardy and vigorous grower, and forms a strong beautiful head capable of bearing enormous loads.

Medium white, changing to lemon-yellow, smooth waxen surface; of good quality, with crisp flesh; very early, and, for an early Apple, an unusually good keeper. Valuable for market. July and August.

A medium to large pinkish Apple. Very firm, white flesh. Acid flavor, vigorous and productive. One of the best for juicy fresh apple pies or flavorful, finely grained apple sauce.
